Av. Ricardo Herrera 1088, Urb. Lima Industrial, Lima - Perú

The company STEEL ENGIL SAC was created on September 20, 2019 in the line of METAL MECHANIC Services and Manufacturing, since that date we are at your disposal to provide the best service and manufacturing of your needs with the ability to promptly fulfill the requirements. work with the highest quality on the market.

We have a wide variety of specialized machinery that gives us the opportunity to do the most complex and diverse jobs in the local and international industry. So much so, that we currently have the most powerful rolling machine in PERU AND SOUTH AMERICA, a 1600 MT per 6m folding machine. Likewise, we have a 3,250m² plant infrastructure in Cercado de Lima and another 4,300m² branch in Ventanilla, which allows us to meet the most demanding customer demands.

OUR MISSION

We are an Engineering, service and manufacturing company, aimed at satisfying the needs of Metalworking, Industrial, Oil, Mining, Construction, Fishing companies, among others.

Our clients are Peruvian and foreign companies, both medium and large in the private and state sectors, which develop relevant projects, demand and value high standards of operational and ethical excellence in the businesses with which we work; providing quality and efficiency with the commitment, participation and leadership of our people and the high performance of our work teams and corporate social responsibility.

OUR VISION

To be a metalworking company recognized in the world for our leadership in the area of engineering, service and manufacturing, which meets the needs of its clients in a totally profitable way, using the use of state-of-the-art machinery, providing them with a comprehensive service with the most high standards of operational efficiency, quality, safety and environmental protection in the market.

MANUFACTURING

- ASTM A572 GR50 or A709 GR50 steel penstock pipe from 14" to 60" in lengths of 6m and thicknesses up to 32mm, also in AC. STAINLESS STEEL.
- Octagonal pipes for high voltage transmission in different diameters.
- 3D and 5D connections, flanged steel and stainless steel spools.
- Cyclone nest, flotation cells, ball mill.
- Fuel storage tanks according to API 650 standard.
- Low and high pressure tanks according to ASME VIII standard.
- Light and heavy metal structures (roofs, hoppers, overhead cranes, etc.).
- Aluminum or Black Iron Bars.

SOCIAL RESPONSABILITY

AVOLDINS

Volunteer Association of the National Institute of Child Health.

STEEL ENGIL S.A.C. He also participates by collaborating with this important social work by helping to collect badges to donate to the Children's Hospital in favor of the child patients who need it so much.

Through our donations of badges we can ensure that children can lead a better quality of life.

By collaborating with the #donation of badges we will be able to continue bringing them diapers, medicines, medical exams, wheelchairs, lunches and groceries for our little patients and their families.

Give a smile to the little patients at the Children's Hospital!
